CYBER THREAT
ASSESSMENT
AND
PLANNING
WORKSHOP

PURPOSE

This workshop assists PSAP leadership and emergency managers in learning how to develop a Cyber Incident Response Process and a Cyber Incident Response Plan. To help the participants understand the nature of these incidents, day one the instructors will provide education on cyber incidents and conduct several live demonstrations of different cyber-attacks including phishing/credential harvesting, ransomware, and business email compromise.

The second day of the workshop begins with an overview of a typical Cyber Incident Response Plan. This is followed by a discussion regarding the connection CSIRP and Continuity of Operations Planning. The remainder of the day is used to help participants use the template to build a response plan for a ransomware attack.

Due to limited availability, we are requesting a 4-person limit per agency/county at this time.

WHO SHOULD ATTEND

- PSAP Governing Body Representatives
- PSAP Coordinators, Directors, Leaders
- PSAP IT Support
- Other organizational Response Team Members

OBJECTIVES

1 Build awareness about the different attack vectors common to public safety and their associated indicators of compromise

2 Provide examples of response plans and how they are developed

3 Demonstrate the connection between the Cyber Incident Response Process and the Continuity of Operations Plan
