

HealthBridge provides something your health plan alone can't — financial security.

Rising deductibles may be costing employees their peace of mind, to the point where some avoid care completely. That's why we started HealthBridge — a first-of-its-kind benefit solution.

HealthBridge sits right alongside your company's health plan. When a member receives a medical service covered by their health plan, from a HealthBridge Network Provider, HealthBridge helps them pay for and manage their out-of-pocket expenses — copays, deductibles, and coinsurance. HealthBridge pays the healthcare provider quickly for what the member owes. Then, we provide members with a consolidated monthly statement and an easy-to-use program to manage those expenses.

HealthBridge helps you:

Protect Employees Financially.

We provide flexible, friendly payment options to employees, without applications or credit checks, reducing the need to dip into savings or turn to high-interest credit cards.

Reduce the Barrage of Bills.

Instead of sending multiple bills, we send members a consolidated monthly statement. They can pay their balance over time, and even get a discount whenever it's paid in full.

Improve Workforce Wellbeing.

The majority of American employees say that financial stress impacts their physical and mental health. Since we alleviate that stress, HealthBridge is a surprising investment in overall wellbeing.
