# Coronavirus Relief Fund Frequently Asked Questions April 22, 2020

## Do governments have to return unspent funds to Treasury?

Yes. Section 601(f)(2) of the Social Security Act, as added by section 5001(a) of the CARES Act, provides for recoupment by the Inspector General of the Department of the Treasury of amounts received from the Coronavirus Relief Fund (the "Fund") that have not been used in a manner consistent with section 601(d) of the Social Security Act. If a government has not used funds it has received to cover costs that were incurred by December 30, 2020, as required by the statute, those funds must be returned to the Department of the Treasury.

# May a State receiving a payment transfer funds to a local government?

Yes, provided that the transfer qualifies as a necessary expenditure incurred due to the public health emergency and meets the other criteria of section 601(d) of the Social Security Act. Such funds would be subject to recoupment by the Treasury Inspector General if they have not been used in a manner consistent with section 601(d) of the Social Security Act.

#### May governments retain assets purchased with these funds?

Yes, if the purchase of the asset was consistent with the limitations on the eligible use of funds provided by section 601(d) of the Social Security Act.

## What records must be kept by governments receiving payment?

A government should keep records sufficient to demonstrate that the amount of Fund payments to the government has been used in accordance with section 601(d) of the Social Security Act.

Treasury's Coronavirus Relief Fund guidance states that funding can be used to meet payroll expenses for public safety, public health, health care, human services, and similar employees whose services are substantially dedicated to mitigating or responding to the COVID-19 public health emergency. How do I determine whether payroll expenses for a given employee satisfy the "substantially dedicated" condition?

The Coronavirus Relief Fund is designed to provide ready funding to address unforeseen financial needs and risks created by the COVID-19 public health emergency. For this reason, and as a matter of administrative convenience in light of the emergency nature of this program, a State, territorial, local, or Tribal government may presume that payroll costs for public health and public safety employees are payments for services substantially dedicated to mitigating or responding to the COVID-19 public health emergency, unless the chief executive (or equivalent) of the relevant government determines that specific circumstances indicate otherwise.
